

**In the Oil Fields**

CONTINUED FROM PRECEDING PAGE  
corner of the southwest of the north  
west of 2-14-15 is a  
Drillers Young and H. G. Goble have  
set up and are ready to drill for  
a test on the N. Thompson acreage,  
located at the center of the west line  
of the northwest of the southeast of  
15-14-15.

**How "Big Smith" Straightened 'Em Out.**  
Yesterday's World carried an item from Washington to the effect that someone had filed a complaint against the Prairie Oil & Gas Co. and the Burman-Willett & Brown Co. of the Shinn farm, recently taken over by J. L. Dehaven and located in the southwest corner of the northwest of the northwest of 2-14-15.

This is not a surprise so far as the oil fraternity is informed, as it had not been thought that there was any trouble anywhere among the employees all of whom are making good wages, and especially those who are thoroughly competent and know how to drill or to handle leases.

It was devolved that C. B. Shaffer has made a practice of paying his men a larger salary than do men situated at a considerable distance from town, on account of excessive charges by the doctors who were obliged to make the trips to their homes.

This was on account of the natural tendency of oil workers to get as close to town as possible, where they could only have good medical treatment but could take in the picture shows, and enjoy life generally.

It is reported that "Big Smith," who is a special officer in Creek county, when he heard that some of the men in the Shaffer employ were on strike went out and told them to "head off the place," and they were soon gone.

It is also about on account of some of the men in oiling districts getting a better pay than those that were close in.

**Valve and Quar.**

The Ohio Cities Gas company has timber moved in for a test on the John W. Whitham farm, located in the southeast corner of the northeast of the northwest of 2-14-15.

The Texas company has a rig up for No. 1 test on the Wallace farm in the southwest corner of the northeast of the northwest of 6-14-15. This test will affect the Gypsy Running Fox well that is being stricken through the sand in order to get more of a shot in, and which is expected to take 75 or 80 barrels daily after the shot.

The Ohio Cities Gas company on the Shippard farm in the southeast corner of the southwest of the northwest of 16-14-15 was shot with seven quarts in the 2,183 to 2,255-foot sand and is producing 25 barrels daily.

The Roxana Petroleum company has a rig up for No. 2 Sleen, located in the northeast corner of the southeast of the northeast of 11-14-15. The sand was found at 2,354 to 2,361 feet.

The Marcellus Petroleum company is right on top of the sand, touched at 3,115 feet on its Miller farm, No. 5, located in the southeast corner of the southeast of the northwest of 14-14-15.

The Atlantic Petroleum company is on the Sherman farm, in the center of the east line of the northeast of the southeast of 14-14-15. They are putting the big pipe at 2,630 feet, preparing to drill.

The Union Refining company is putting a rig for a test on the front farm, located in the northeast corner of the northeast of the northwest of 6-14-15.

The Magnolia Petroleum company No. 1 Brook, located in the northeast of the southeast of the northwest of 6-14-15, is drilling at 1,450 feet.

The Alice Katheryn Oil company is in today with No. 1 Brock, located in the northeast corner of the southwest of the northeast of 6-14-15. They are putting the big pipe at 2,630 feet, preparing to drill.

The Union Refining company is putting a rig for a test on the front farm, located in the northeast corner of the northeast of the northwest of 6-14-15.

The Magnolia Petroleum company No. 1 Hunter, located in the northeast of the southeast of the northwest of 6-14-15, is drilling at 1,450 feet.

The same firm is putting up on No. 2 well on the same farm.

The same people, drilling on the Jones farm in the northwest of the northwest of the southwest of 6-14-15, are drilling at 2,315 feet.

No. 3 on this same farm is good for 25 barrels natural in the Barnevile, found from 3,102 to 3,196 feet.

A. Bullock and Garber, The Mid-Continent Petroleum company test on the T. P. O'Neill farm in the
